

Pallet Assembly Jigs

- Laser cut plywood, 14 stainless steel rib alignment angles and 56 screws provided.
- Assemble jig with a screw driver in less than 15 minutes.
- Tighten screws in pre-drilled holes at the center location of angle slots for all angles, except for two end stop angles that are shifted outward.
- Adjust angle positions for blank tolerances to ease assembly, only if required.
- Practice hand positions and assembly techniques from assembly video and under 60 second assembly is typical after assembly of 50 pallets.
- Lifdek pallet assembly jigs are available for every pallet size / designation. Assembly jigs are \$200 plus shipping. Drawings are also provided if preferred to manufacture locally instead.
